

## About Dan Vals

Dan Vals is a long-established specialist in section bending for particularly the wind, industrial, construction and transport sectors as well as for the maritime sector. We have a creative and solution-oriented approach to the jobs we are given and focus on deliveries on a global scale. Dan Vals is characterised by quality, security of supply, creativity and a high degree of finish.

## Why choose Dan Vals?

### COMPETENCES

Many years' experience and a continuing curiosity about perfectly forming steel and aluminium means that we are specialists within our field and exporting worldwide.

### HIGH QUALITY

Attaining the highest degree of quality requires up-to-date production equipment and the core of Dan Vals comprises committed staff who have the ability to use cutting-edge technology in the production processes.

### ENVIRONMENTALLY CONSCIOUS

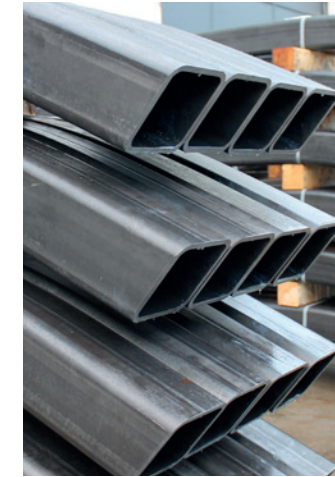

Having a management system which defines an environmental policy and complying with it are paramount to us. For this reason, Dan Vals is ISO 14001-certified.

### INDUSTRY

We perform jobs for small and medium-sized industrial companies as well as industrial giants - both special profiles to order and serial production. Always at the agreed time and price and all products are subject to scrupulous quality control prior to delivery.

### CONSTRUCTION

In our production of larger and smaller components, we form and cover all types of construction. The aluminium profiles at the front of the aquarium "Den Blå Planet" and the twisted profiles used as sunshade at the multi-storey carpark of "Rigshospitalet" were made by us.

### TRANSPORT

Innovative solutions from Dan Vals help the transport sector along the way. Manufacturers of trains, passenger vehicles and lorries, aeroplanes, agricultural and construction machines choose us and our foremost task is to create value for our customers.

### WIND

Since our company was established, Dan Vals has ridden the green wave with the wind sector and jobs are performed quickly and precisely. We are proud to help develop the wind sector and bend parts for e.g. blades, tower flanges, foundations for offshore wind turbines as well as nacelle components.

### MARITIME

Dan Vals produces aluminium and steel profiles for exclusive, multi-billion yachts. Perfect finish and indisputably high quality are givens and we deliver profiles that are perfectly produced down to the last detail.
