

Experts in profile bending for all purposes

Dan Vals A/S

Our area of specialization is profile bending and we are subcontractors of companies within the wind-, construction-, and transport industries. We offer you the best solutions at the best prices.

As our customer you will experience how we accommodate your wishes and strive to provide you with increasingly effective and flexible solutions.

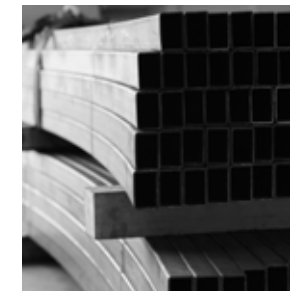

We give fine craftsmanship pride of place, our employees are competent, dedicated and experienced and we never compromise on quality.

We offer you the best solutions at the best prices.

Capacity

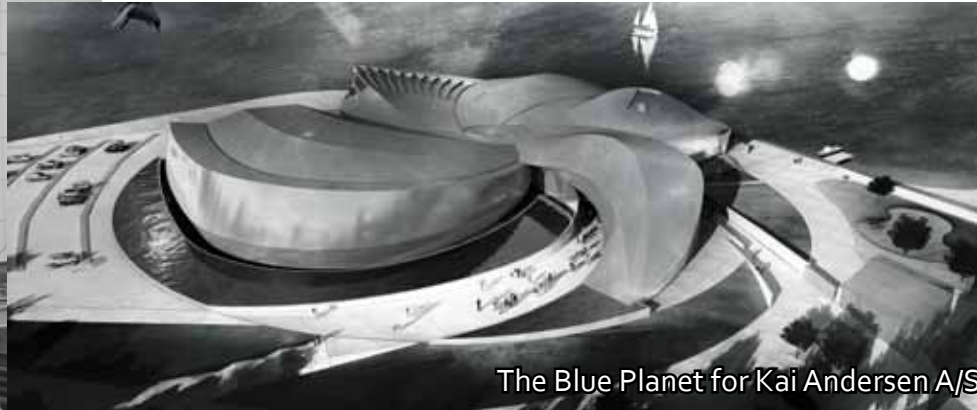

Many years of experience with profile bending within a broad spectrum of the Danish industry have given us full knowledge of various materials and bending methods – we have even developed a new rolling - and form technique that will keep your costs down. We bend all types of materials from ordinary black steel and stainless steel to aluminium.

Dan Vals A/S has a total indoor area of 4000 m² and a crane capacity of up to 16 tonnes. This enables us to produce and work with very big orders. We handle single orders as well as series. No order is too big or too small.

Bending of customised profiles

One of the advantages of combining rolling with press-brake rolling is that welds are partially or wholly avoided. Examples of rolled customised profiles are cassettes, facings and coverings for columns in the following materials: steel, stainless steel, galvanized steel, aluzinc, and aluminium.

Quality and Service

We know that our customers are busy. This is why we make sure that you do not have to worry about the rolling process. We are a dedicated subcontractor and we process your order fast and precisely. Our most important task is to create value for our customers and we do this by delivering the agreed product punctually and at the right price.

Keep track of your order

You can always obtain information as to how far along the order is, whether the goods have been sent or when this will happen. All our products are subject to careful quality control before they are delivered to you.

Advice

Our experienced employees are ready to advise you if you have an order or a project of which you would like to get a competent and professional assessment.

You are also welcome to send us an e-mail at info@danvals.dk
